NATIONAL LIFELINE

LEBANON’S NATIONAL EMOTIONAL SUPPORT AND SUICIDE PREVENTION HELPLINE

in collaboration with the national mental health program at the ministry of public health

MONTHLY LIFELINE INDICATORS

REPORTING PERIOD

January 2023
INTRODUCTION

The Lifeline is the national helpline in Lebanon for emotional support and suicide prevention. As part of its mission, and in collaboration with the National Mental Health Program of the Ministry of Public Health (MOPH), aggregate data related to the Lifeline is captured, analyzed and disseminated on a monthly basis and annually for a yearly snapshot. The data is meant to offer a snapshot of the characteristics of callers to the helpline.

METHODOLOGY

The National Lifeline’s trained operators capture anonymous data through a secure computerized system. The non-identifiable data is then analyzed and reported on a monthly basis.

The numbers in this report are meant to offer a snapshot of the population that the National Lifeline serves. Please note that while that this information is recorded as accurately as possible, not all information may always be available. Unless otherwise indicated, the frequencies and percentages reported in this document represents the percentage of observations in a given category out of the total non-missing information. The metrics in this document can be considered representative of calls received during the reported time-period.

www.embracelebanon.org
January 2023
TOTAL NUMBER OF CALLS WITH CAPTURED DATA
921

I. AGE OF CALLERS (n = 818)

- <18: 6%
- 18-34: 21%
- 35-49: 9%
- 50-64: 6%
- 65+: 1%
- Not Reported: 1%

MEAN AGE: 31

II. SEX OF CALLERS

- Female: 52%
- Male: 48%

III. COUNTRY OF CALLERS

- Lebanon: 99%
- Not Reported: 1%
IV. HOW CALLERS HEARD ABOUT THE LIFELINE

252 callers informed us of how they first learned about the National Lifeline. The below chart summarizes their responses.

- TV: 2%
- Emergency Services: 2%
- Agencies: 4%
- NGO: 4%
- Internet search: 6%
- Outreach: 7%
- Other: 11%
- Mental Health Professional: 22%
- Family/Friend: 39%

*Note: Percentages may not add up to 100% because each caller may have more than one status.

V. SEXUAL ORIENTATION OF CALLERS

12% of calls received by the Embrace Lifeline come from self-identifying LGBTQI+ individuals.

VI. NATIONALITY OF CALLERS

- Lebanese: 75%
- Not Reported: 13%
- Syrian: 10%
- Palestinian: 1%
- Others*: 1%

*Ethiopia, Iran, Jordan, Malaysia, Romania, Tunisia
VII. REGION OF RESIDENCE AMONG CALLERS FROM LEBANON

- 32% Mount Lebanon
- 31% Beirut
- 17% Not Reported
- 5% South
- 6% North
- 3% Bekaa
- 2% Baalbek
- 2% Nabatiyeh
- 2% Akkar

VIII. MARITAL STATUS OF CALLERS

- 45% Single
- 23% Not Reported
- 14% Married
- 7% Divorced
- 7% In a Relationship
- 3% Separated
- 1% Widowed
IX. CALLER LIVING WITH

- Nuclear Family: 65%
- Not Reported: 19%
- Alone: 13%
- Partner: 2%
- Homeless: 2%
- Roomate: 2%
- Extended Family: 1%
- Living others: 1%

*XNote: Percentages may not add up to 100% because each caller may endorse more than one living status.

X. HIGHEST LEVEL OF EDUCATION OF CALLERS

- Not reported: 3%
- Operator did not ask: 31%
- Master's Degree Completed (MS, MA, DESS): 9%
- Bachelor's Degree (BS, BA, DEA): 32%
- Vocational/Technical Degree: 4%
- High School (10th to 12th Grade): 11%
- Middle School (7th to 9th Grade): 4%
- Primary/Elementary School (1st to 6th Grade): 2%
- Did Not Complete Primary/Elementary School: 5%
XI. EMPLOYMENT OF CALLERS

*Note: Percentages may not add up to 100% because each caller may have more than one status.

XII. CHANGE IN LEVEL OF DISTRESS FROM BEGINNING TO END OF CALL

91% of calls with available data for this indicator (n=300) reported a decrease in the level of distress from the beginning of the call to the end of the call. 8% of calls were from individuals whose level of distress did not change from the beginning to the end of the call. And 1% reported an increase in their level of distress from the beginning to the end of the call.

*Note: In some callers, the level of distress may continue to be high even after seeking support from an emotional support service such as the National Lifeline, as the intensity of their distress may be linked to stressors they are facing that may remain unresolved. The Lifeline will orient callers to available resources and services depending on their needs. When received, such services would decrease their psychological distress.

XIII. CALLERS CURRENTLY SEEKING MENTAL HEALTH SERVICES

42% of calls with available data for this indicator (n=676) are from individuals who reported currently receiving at least 1 mental health service.
XIV. TYPE OF CALL

*Note: This indicator is assessed by the operator based on their conversation with the caller. Percentages may not add up to 100% because the caller can express more than one type of concern (e.g., a caller could express both socioeconomic concerns and emotional distress).

XV. SUICIDE ATTEMPT ONGOING

2% of calls were from individuals who had a suicide attempt that was ongoing during the call.
106 Quality assurance calls were conducted in January. 93 responded and agreed to participate. Beneficiaries were asked to rate their level of satisfaction with the services received during their initial call on a scale of 1 to 5 with higher numbers indicating greater satisfaction. Across all 93 callers, the average satisfaction rating was 4.47.

The below figure outlines caller-reported outcomes of their initial call to the Lifeline (N=93)

- Nothing Changed: 8%
- Felt more empowered to solve the presenting problem: 71%
- Felt pessimistic/unsure about the future: 1%
- Felt hopeful/confident about the future: 58%
- Felt more distressed: 1%
- Felt less distressed: 91%

*Note: Callers contacting the National Lifeline may be experiencing chronic/physical or socioeconomic difficulties which cannot be improved by a call to the National Lifeline (Emotional Support and Suicide Prevention Hotline).
III. RECOMMEND

99% of callers (n=93) reported that they would recommend the Lifeline to others in need of assistance.

IV. CALL BACK

96% of callers with available data (n=90) reported that they would call the Lifeline again if they were experiencing emotional distress or thinking about suicide.

Note: 3 out of the 93 callers were frequent callers and were asked slightly different questions than the regular callers. These 3 were asked if their calls to the lifeline are helping them in acquiring skills that they can use daily when they experience any emotional distress or thinking about suicide instead of calling back the Lifeline. All of the three answered yes on this question.

IV. HELPFULNESS OF THE ORIENTATION TO OTHER SERVICES

55 of the 93 callers were provided with referrals during their initial call to the Lifeline. 35% reported that the service was helpful. 33% reported that the service was not helpful due to issues related to the agencies themselves, location, budget, unavailable service, preferences of the caller or personal reasons. 25% did not use the service yet due to various personal reasons and 7% are waiting for the NGO/agency to reply to them about possible appointment or service.

Note: not applicable is referred to either did not use the service yet or waiting for the agency’s reply.
X. SOCIAL WORK

The Lifeline social worker aims to orient and manage the cases of callers who call the National Lifeline (1564) and are in imminent suicide risk with supportive community resources when persons are in life threatening situations and are in need of resourcing. This is done through orientations to organizations providing mental health or other livelihood or protection services and case management services. The Lifeline social worker coordinates with other members of the Lifeline team including operators, lifeline supervisors and lifeline manager.
