

EMBRACE MENTAL HEALTH CENTER

CLINIC INDICATORS REPORT 008

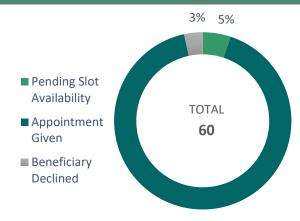

REPORTING PERIOD MAY 2021

60

Disclaimer: The below numbers are meant to offer a snapshot of the activities hosted and beneficiaries served at the Embrace Mental Health Center. While information is recorded as accurately as possible, not all information is available at all times.

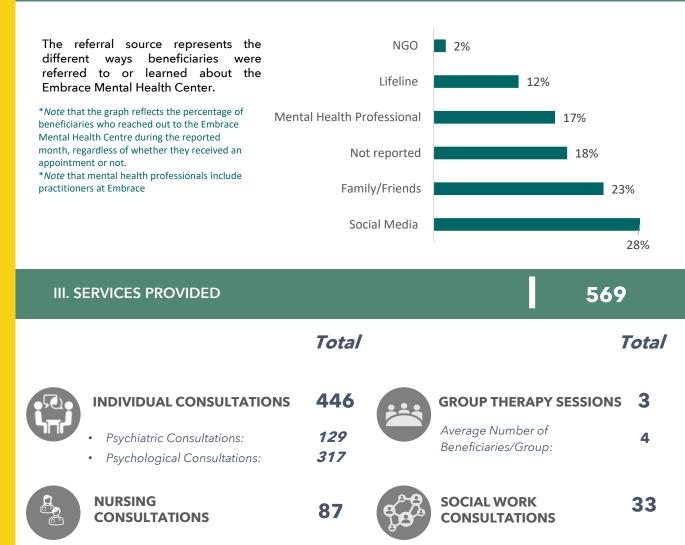

I. NEW REQUESTS FOR SERVICES

Every beneficiary that calls the clinic is briefly screened to better gather basic demographic information, understand the reason for which they are seeking services, and orient them accordingly. The new requests represents the number of people who called requesting EMHC services. The outcome of the new requests represents the decision taken after the information was gathered from the potential beneficiary.

MOST COMMONLY ACQUIRED MEDICATIONS:

Neanxetine

Proxetine

6

VIII. MEDICAL REFERRALS

During the month of May, **6** beneficiaries were referred by Embrace psychiatrists to the medical Lab at Medical Diagnostic Treatment Center to undergo medical tests. All 6 beneficiaries were tested for blood tests measuring the levels of Folic Acid, TSH, Urea, Creatinine, and Calcium.

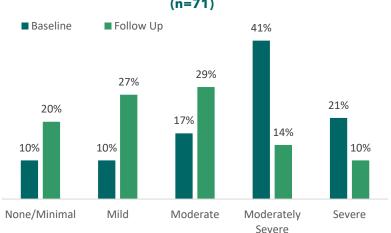

IX. MENTAL HEALTH SURVEY SCORES

During their first visit, the beneficiaries are asked about common symptoms of depression, anxiety and trauma. As they progress through treatment, beneficiaries are asked to take the same surveys again every few months.

The questionnaires are:

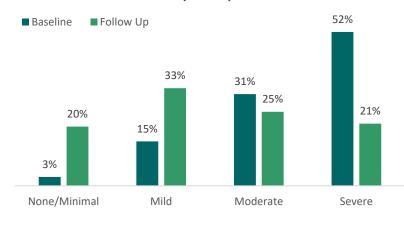

- 1. PHQ-9: a validated instrument for measuring the severity of depression.
- 2. GAD-7: a validated instrument for measuring the severity of anxiety.
- **3. TSQ:** a brief trauma questionnaire used to predict a PTSD diagnosis.

A SNAPSHOT OF BENEFICIARY IMPROVEMENT OVER 6 MONTHS October 2020 - April 2021

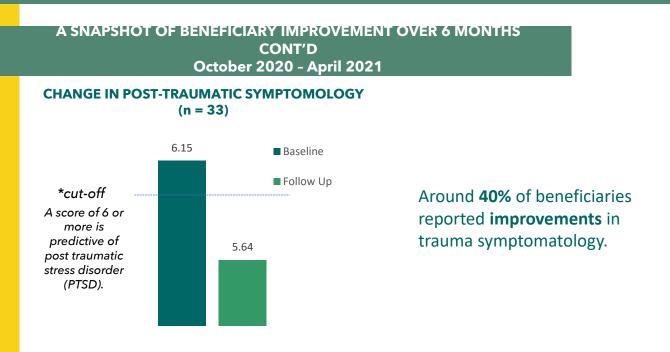

Around **66%** of beneficiaries reported substantial improvements in symptoms of depression.

CHANGE IN ANXIETY SYMPTOM SEVERITY (n = 76)

Around **68%** of beneficiaries reported substantial improvements in symptoms of anxiety.

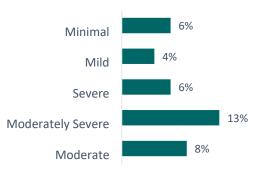

CHANGE IN DEPRESSIVE SYMPTOM SEVERITY (n=71)

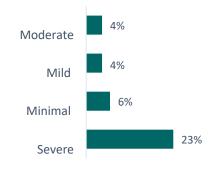

MENTAL HEALTH SURVEY SCORES AT FIRST ENCOUNTER

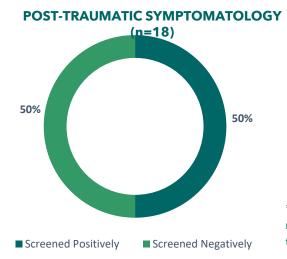

The below charts present a summary of symptom severity for beneficiaries whose first session was this month (i.e., the charts represent scores at beneficiaries' first session):

***Note** that screening positively or negatively does not determine or rule out a diagnosis. Screening positively is predictive of post traumatic stress disorder (PTSD).

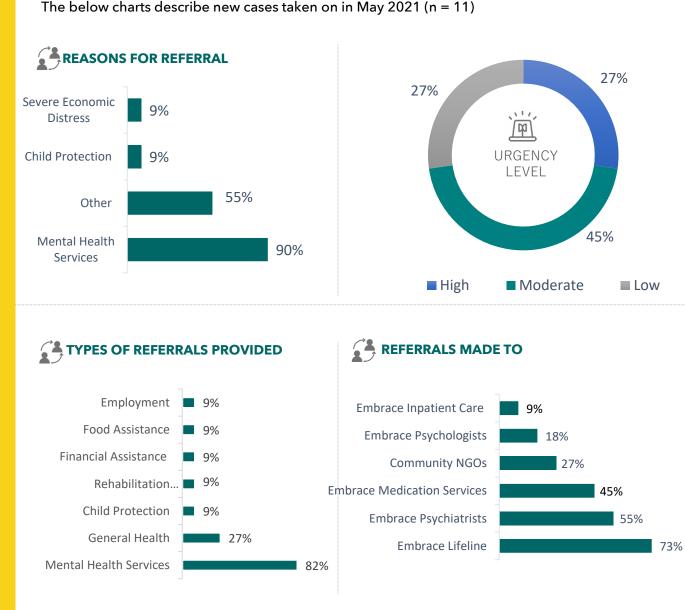

X. ZOOM IN ON SOCIAL WORK DEPARTMENT

The social work department at Embrace serves both the Embrace Mental Health Center (EMHC) and the Embrace Lifeline. It aims to provide a holistic approach to mental health care by offering psycho-social assistance to beneficiaries served by both the EMHC and the Lifeline. The EMHC and Embrace Lifeline are resourced with comprehensive referral networks linked with governmental and non-governmental organizations that provide a wide range of psychosocial services from livelihood, shelter, basic assistance, child protection, and organizations catering to the needs of vulnerable groups such as refugees, LGBTQ community and persons affected by gender-based violence. The department is currently staff by one social worker who coordinates with a multi-disciplinary internal team of psychologists, psychologists, psychiatric nurse, hotline operators and clinical supervisors.
